

## How to Update using our HTTP Site

**You must install TERMS Version 2.50 from our CD Rom before installing this product. You should have received this CD-Rom in June 2004 (TERMS only).**

**Please make sure the program is closed before installing this update.**

This Service Release was updated on November 2, 2004 and we are now at Version 2.53.

Download the Vers25sr3.zip from

<http://www.maxcomonline.com/cs/downloads/version25/terms/vers25sr3.zip>

The file will automatically upload to your computer (if you have a Zip Compression Program). Click on the Extract and extract the contents to your WT32 folder, which is the one that is our Default Application directory. Overwrite files if asked to do so.

Open the TERMS program through Start, and then Programs and MCT MSDS Software.

If you have already ran the DBUpdate (such as if you are in Version 2.5 or above) you do not have to run it again.

To verify that the patch was applied, go to Help and About TERMS . Check to make sure the version number under the product name is 2.5.3

See the [revisions.htm](#) for all releases from 2.20 to the latest release.

Thanks!  
Technical Support
